Objective

Computer Science postgraduate student with hands-on experience in C, Python, Linux and systems programming. Seeking an entry-level Software Developer role focused on backend performance and system-level development to apply my skills and grow in a dynamic environment.

Technical Skills

Programming Languages: C, Python, Rust(Basic)

Technologies/ Tools: Git, Linux, Docker(Basic), REST APIs, VS Code, Vim

Databases: PostgreSQL, MySQL

Core Concepts: Data Structures, Computer Networks, Operating Systems, DBMS

Projects

SysMon - Linux Process Monitoring Tool

github.com/rohitgoswami07/Sysmon-Project/ 

- Built a Linux system monitoring tool using C(backend) and Python(GUI) for real-time process tracking and control via POSIX signals.
- Parsed /proc filesystem to collect CPU and memory metrics.
- Implemented IPC using UNIX domain sockets between backend and GUI.
- Designed snapshot-based CPU usage calculation.
- **Technologies Used:** C, Python, Linux, POSIX, UNIX Domain Sockets, JSON

Mini Compiler using Rust

github.com/rohitgoswami07/mini-compiler-rust- 

- Built a multi-stage compiler in Rust translating a custom DSL to ARM-style assembly
- Designed modular architecture across 4 components: Lexer, Parser, Semantic Analyzer, and Code Generator
- Implemented error handling, type safety, and semantic validation ensuring reliable, production-quality code
- **Technologies Used:** Rust, Compiler Design, ARM Assembly, DSL

Mini Docker - Container Runtime with Integrated SysMon

[Ongoing]

- Extending SysMon to monitor Docker containers by integrating Docker CLI commands to track container-level CPU, memory, and process activity in real time.
- Implementing backend logic in C to parse Docker CLI outputs and correlate container metrics with host /proc data for unified system and container monitoring.
- Enabling container control via SysMon GUI using Docker CLI, providing a lightweight alternative to full orchestration tools.
- **Technologies Used:** C, Python, UNIX Domain SocketsLinux Shell Programming, Docker CLI, JSON

Education

Department of Computer Science, Savitribai Phule Pune University, 2024 - 2026(Expected)
Pune, Maharashtra

Master of Science (M.Sc.) in Computer Science CGPA: 7.55

Nowrosjee Wadia College, Pune, Maharashtra 2020 - 2023

Bachelor of Science(B.Sc.) in Computer Science Grade: A

Certifications

- Python (Basic) – HackerRank
- SQL (PostgreSQL) – HackerRank
